# **1. Introduction**

## **1.1 About Smart2Pay**

Smart2Pay<sup>TM</sup> is a Payment Service Provider specializing in Internet payments since 2002. Our head office is based in Amsterdam area (Holland); we have offices in Austria, Brazil and Romania. We have partnered with many banks and financial institutions all over the world. We are a one stop shop for leading Merchants selling goods or services over the internet globally. If you need to increase your sales and collect funds from consumers globally, join us. We offer state of the art payment solutions for internet merchants. For more information on Smart2Pay Payment Service provider, please visit [www.smart2pay.com](http://www.smart2pay.com).

## **1.2 About GlobalPay**

The GlobalPay payment platform allows Merchants to collect funds from Customers locally in over 70 countries by signing one single contract through one technical interface.

Online merchants have access to many (alternative) payment options ranging from online bank transfer (real-time), local regular bank transfer (intraday reporting), ATM payments, Cash Payments, local E-wallet (real-time), Mobile payments (real-time) to Credit and Debit Card processing.

GlobalPay is a payment platform that covers the world for online Sellers. It covers all important payment options over the world in one go and is simple to integrate and maintain while providing maximum security and scalability.

For more details on GlobalPay payment platform, please request GlobalPay Merchant Integration Guide and GlobalPay Merchant Dashboard Guide from [support@smart2pay.com](mailto:support@smart2pay.com).

## **1.3 About Smart2Pay Prestashop Plugin**

Smart2Pay Prestashop plugin connects your Prestashop store to GlobalPay, the latest payment platform of Smart2Pay.

## **1.4 About Merchant Integration Guide**

This document is aimed at Prestashop websites administrators as it provides necessary details on how to install and configure the plugin on your Prestashop store.

## 2. Smart2Pay Prestashop Plugin installation

### 2.1 Plugin version and compatibility list

Current stable plugin version of Prestashop is 1.1.9 for Payment Module and 1.1.9 for Detection Module. Smart2Pay plugin is compatible with Prestashop version 1.4, 1.5, and 1.6.1.2.

### 2.2 Installation

After downloading the archive from <https://github.com/smart2pay/PrestaShop>, you can install our plugin by following these steps:

1. From Prestashop Back Office go to MODULES->Modules, press Add a new module and then select our archived module, as showed in the below picture.

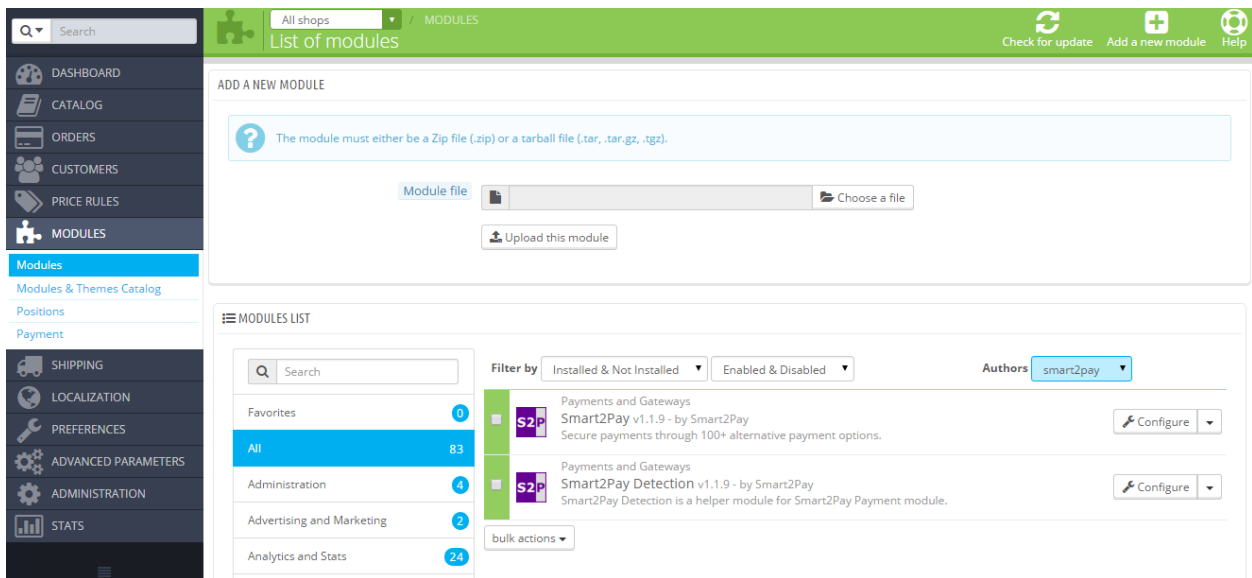

Image 1 – List of modules

2. Copy the contents of the archive in your Prestashop /Modules folder.

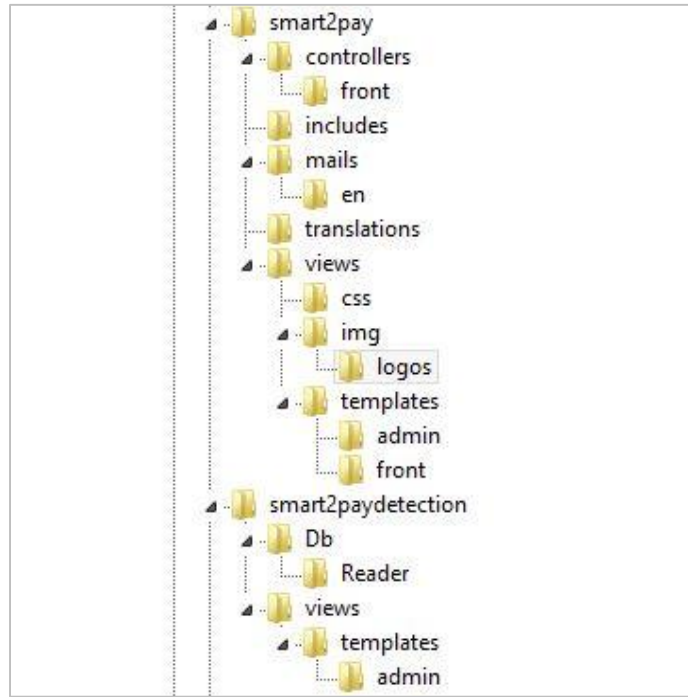

Image 2 - Prestashop /Modules folder

## 3. Smart2Pay Prestashop plugin configuration

### 3.1 Smart2Pay environments

Smart2Pay offers 3 environments you can use to interact with our payment platform.

**Demo** - you should start in Demo environment where you can activate which payment method you plan to use so you can test our plugin right away. No activation of merchant account is required. You can test various payment flows for more than 150 payment methods. The order status does not update in this environment, you need to use Test and Live environments for an end to end testing.

**Test** - Once you are familiar with payment flows you should register for a test account online at: <https://dashboardtest.smart2pay.com/Account/Register>. You will receive an e-mail from our merchant integration team with more details such as your test MID and instructions on how to generate the test signature and setup the notification URL where OpenCart will receive payment status change notifications so your orders are correctly updated once the payment flows are completed.

**Live** - After testing is completed you can request your production account at: <https://dashboard.smart2pay.com/Account/Register>

You can always contact our Merchant Integration Team to request additional information about our services at: [support@smart2pay.com](mailto:support@smart2pay.com).

### 3.2 Plugin configuration

The configurations for the Smart2Pay Prestashop plugin can be found in the administration area of Prestashop under: MODULES->Modules-> Smart2Pay->Configure.

Note: Smart2Pay plugin contains the generic configurations that are necessary to connect your store with the payment platform. You will also need to activate the payment methods that you intend to use: e.g. Smart2Pay Paysafecard, Smart2Pay UKash, Smart2Pay iDEAL etc.

Please make sure that Smart2Pay module is enabled from *MODULES->Modules->Modules List->Filter by->Installed Modules, Author: Smart2Pay*.

**NOTE:** For a better understanding of our plugin, please check our integration guide: [Smart2Pay PrestaShop Integration Guide.pdf](#)

#### SETTINGS

\* Enabled

Yes

\* Environment

Demo

\* Post URL Live

https://api.smart2pay.com

\* Post URL Test

https://apitest.smart2pay.com

\* MID Live

\* MID Test

\* Site ID

\* Skin ID

\* Signature Live

\* Signature Test

\* Return URL

http://[REDACTED]prestashop1609/index.php?fc=module&module=smart2pay&controller=returnHandler

Default Return URL for this store configuration is:  
http://s2pubuntu.cloudapp.net/prestashop1609/index.php?fc=module&module=smart2pay&controller=returnHandler

Notification URL for this store configuration is:  
http://s2pubuntu.cloudapp.net/prestashop1609/index.php?fc=module&module=smart2pay&controller=replyHandler

\* Force country

- Don't force country -

If this option is selected Country detection will be disregarded.  
NOTE: Please be sure all your clients can make payments in selected country.

Country detection

No

Plugin will try detecting visitor's country by IP. Country is important for plugin as payment methods are displayed depending on country.

Image 3 – Smart2Pay Payment Module

The available options are described in the following table:

Field	Description	Type	Sample
<b>Enabled</b>	Defines whether the Smart2Pay payment module is active or not. If it is active it will appear in the payment method lists (see image no. 4)	Boolean	Yes
<b>Environment</b>	The environment to which the plugin points to. If Test is selected then the Post URL Test, Signature Test and MID Test will be used when making the payment. If Demo environment is selected, shop will create transactions on a predefined MID, SiteID and Signature combination, just so that you can see an end-to-end transaction flow. This will not require any registration on your behalf on our test or live platforms. However, keep in mind that your shop will not receive background notifications about order updates so not all details and functionality for an order will be available / visible.	[Demo, Test, Live]	Demo
<b>Post URL Live</b>	The URL of GlobalPay API live environment.	String	<a href="https://api.smart2pay.com">https://api.smart2pay.com</a>
<b>Post URL Test</b>	The URL of GlobalPay API integration environment.	String	<a href="https://apitest.smart2pay.com">https://apitest.smart2pay.com</a>
<b>MID Live</b>	The Merchant ID for the live environment. Create an account from <a href="https://dashboard.smart2pay.com">https://dashboard.smart2pay.com</a> The account will be activated by Smart2Pay Operations Team and you will receive an e-mail containing the MID.	Integer	0
<b>MID Test</b>	The Merchant ID for the test environment. Create an account from <a href="https://dashboardtest.smart2pay.com">https://dashboardtest.smart2pay.com</a> . The account will be activated by Smart2Pay Operations Team and you will receive an e-mail containing the MID.	Integer	1045

<b>SitelD</b>	If you are handling multiple Prestashop websites and want to use a single MerchantID for all of them, you need to configure multiple websites from GlobalPay Merchant Dashboard, configuration tab.	Integer	30102
<b>Skin ID</b>	Specify the skin ID. The skins can be created in the Online Skin Editor available in the GlobalPay Merchant Dashboard or by uploading a CSS file.	Integer	0
<b>Signature Live</b>	The signature that will be used to compute the hash for live environment. You can set up your signature at: <a href="https://dashboard.smart2pay.com">https://dashboard.smart2pay.com</a> , Configuration Tab->Signature for live environment.	String	
<b>Signature Test</b>	The signature that will be used to compute the hash for test environment. You can set up your signature at: <a href="https://dashboardtest.smart2pay.com">https://dashboardtest.smart2pay.com</a> for test environment.	String	38ed98c7-2701
<b>Return URL</b>	An URL where the customer will be redirected after the payment process ends. It is advisable to include the route smart2pay/feedback action which displays a friendly message to the user depending on the redirection status of the transaction. This field is filled automatically by plugin at install time. If however, this URL doesn't work for you, you can manually correct it in a similar way which is presented in Sample column.	String	<a href="http://www.merchant.com/prestashop1609/index.php?fc=module&amp;module=smart2pay&amp;controller=returnHandler&amp;id_lang=1">http://www.merchant.com/prestashop1609/index.php?fc=module&amp;module=smart2pay&amp;controller=returnHandler&amp;id_lang=1</a>
<b>Force country</b>	If this option is selected Country detection will be disregarded.  NOTE: Please be sure all your clients can make payments in selected country.	List	Don't force country
<b>Country detection</b>	Plugin will try detecting visitor's country by IP. Country is important	Boolean	Yes

	<p>for plugin as payment methods are displayed depending on country.</p> <p>Country detection is available when you install and activate Smart2Pay Detection plugin.</p> <p>If you select Yes and country detection plugin is not installed, plugin will use as fallback country set in customer's billing address.</p>		
<b>Fallback country</b>	If the country detection fails or set to 'No', the module will use the country set in this field (by default will be: country set in billing address).	List	Country From Billing Address
<b>Send order number as product description</b>	If set to 'Yes', the Prestashop order number will be sent as description. If 'No' is selected, the below custom description will be sent.	Boolean	Yes
<b>Custom product description</b>	Specifies a global description that will be sent for all the transactions.	String	Custom product description
<b>Create invoice on success</b>	If set to 'Yes', the system automatically creates an invoice if payment is successfully completed. The invoice is automatically set to 'paid'.	Boolean	Yes
<b>Notify customer by email</b>	If set to 'Yes', the system automatically sends a confirmation email to the customer on success payment notification.	Boolean	Yes
<b>Send payment instructions on order creation</b>	For Bank Transfer and Multibanco SIBS, Prestashop can send a confirmation email to the customer on order creation with payment details.	Boolean	Yes
<b>Alter order total based on surcharge</b>	When using a payment method which has a surcharge amount or percent set, order total will be incremented with resulting surcharge amount.	Boolean	Yes
<b>Surcharge will use currency (display only)</b>	When displaying surcharge amount in checkout flow, it will use currency that is: setup in front-end or used in payment method setup	List	Setup in front-end
<b>Surcharge display</b>	The display of the surcharge amount	List	Separated percent and fixed

<b>amount</b>	in the checkout flow as: separated percent and fixed amount, as sum of percent and fixed amount or as total amount for the order		amount
<b>New Order Status</b>	The status of the order when a new order is created.	List	Smart2Pay – Awaiting payment
<b>Order status on SUCCESS</b>	You should only deliver the goods/services based on the success notifications. The notifications are received at the notification URL which you set up in the GlobalPay merchant dashboard available at: <a href="https://dashboardtest.smart2pay.com">https://dashboardtest.smart2pay.com</a> . The notification URL is in the form: <a href="http://www.merchant.com/index.php?fc=module&amp;module=smart2pay&amp;controller=replyHandler&amp;id_lang=1">http://www.merchant.com/index.php?fc=module&amp;module=smart2pay&amp;controller=replyHandler&amp;id_lang=1</a> . Prestashop Smart2Pay_GlobalPay Plugin automatically updates the order status according to the received notifications. This configuration defines the status of the order when the payment has been successfully completed and a 'success' notification is sent by GlobalPay system. You can release the goods/services in this case.	List	Smart2Pay – Awaiting payment
<b>Order status on CANCEL</b>	The status of the order when a 'canceled' notification is received from Smart2Pay's GlobalPay system.	List	Smart2Pay –Canceled payment
<b>Order status on FAIL</b>	The status of the order when a 'failed' notification is received from Smart2Pay's GlobalPay system.	List	Smart2Pay –Failed payment
<b>Order status on EXPIRED</b>	The status of the order when an 'expired' notification is received from Smart2Pay's GlobalPay system.	List	Smart2Pay –Expired payment
<b>Message Success</b>	The message that is displayed at the end of the payment flow when the redirection status is a success. You should only deliver the goods/services based on the success notification received at the notification URL which you set up in	String	Thank you, the transaction was processed successfully. After we receive the final confirmation, we will release the goods.

	the GlobalPay merchant dashboard available at: <a href="https://dashboardtest.smart2pay.com">https://dashboardtest.smart2pay.com</a> . The notification URL is in the form: <a href="http://www.merchant.com/index.php?fc=module&amp;module=smart2pay&amp;controller=replyHandler&amp;id_lang=1">http://www.merchant.com/index.php?fc=module&amp;module=smart2pay&amp;controller=replyHandler&amp;id_lang=1</a> .		
<b>Message Failed</b>	The message that is displayed at the end of the payment flow when the customer is redirected with a failed status.	String	There was a problem processing your payment. Please try again.
<b>Message Canceled</b>	The message that is displayed at the end of the payment flow when the customer has canceled the payment.	String	You canceled the payment.
<b>Message Pending</b>	The message that is displayed to the customer when the redirection status is unknown or the customer must take additional actions to complete the payment: e.g. go to the bank and make an offline bank transfer.	String	Thank you, the transaction is pending. After we receive the final confirmation, we will release the goods.
<b>Skip payment page</b>	If set to 'Yes', if all the necessary parameters are sent in the initial POST for a specific payment method, the GlobalPay payment page is skipped and the customer is redirected automatically to the payment method provider.	Boolean	No
<b>Redirect in IFrame</b>	If set to 'Yes', GlobalPay will try to keep the payment flow inside the IFrame. Only some payment methods providers support IFrames, for the others the customer will be redirected to the provider in the main window. See image 5.	Boolean	No
<b>[Debug form]</b>	For integration/debugging purposes only. If set to 'Yes', a form with the values sent in the initial POST to GlobalPay will be displayed prior to the actual POST.	Boolean	Yes

Image 13 – Order confirmation

After order confirmation the customer is redirected to the chosen payment method provider where he finalizes the payment.

The image shows the Smart2Pay payment interface. At the top, there are two tabs: 'paysafecard' and 'my paysafecard', with the latter being selected. Below the tabs, the main area is divided into two columns. The left column is titled 'Pay with the 16-digit PIN' and contains four input fields for the PIN, with the third field currently containing a vertical line. Below the input fields are links for 'Enter additional PINs', 'Credit balance', and 'Currency converter'. The right column is titled 'Current payment' and shows the 'Amount: 8.70 EUR'. Below this is a checkbox labeled 'Yes, I agree to the Terms of paysafecard.' with the word 'Terms' as a link. At the bottom of the right column are 'Cancel' and 'Pay' buttons. A footer bar at the very bottom contains the website 'www.paysafecard.com' and a 'Disclaimer' link.

Image14 - Smart2Pay payment page

The image shows the Smart2Pay payment page after a successful transaction. It features a light gray background with a white border. At the top, a box displays 'Current payment' and 'Amount: 8.70 EUR'. Below this, a larger box contains the message: 'The payment was successful, you will be redirected instantly. If your Web browser does not support redirections, please click [here](#)'. At the bottom, a footer bar shows 'www.paysafecard.com' and a 'Disclaimer' link.

Image 15 – Smart2Pay payment page with success status

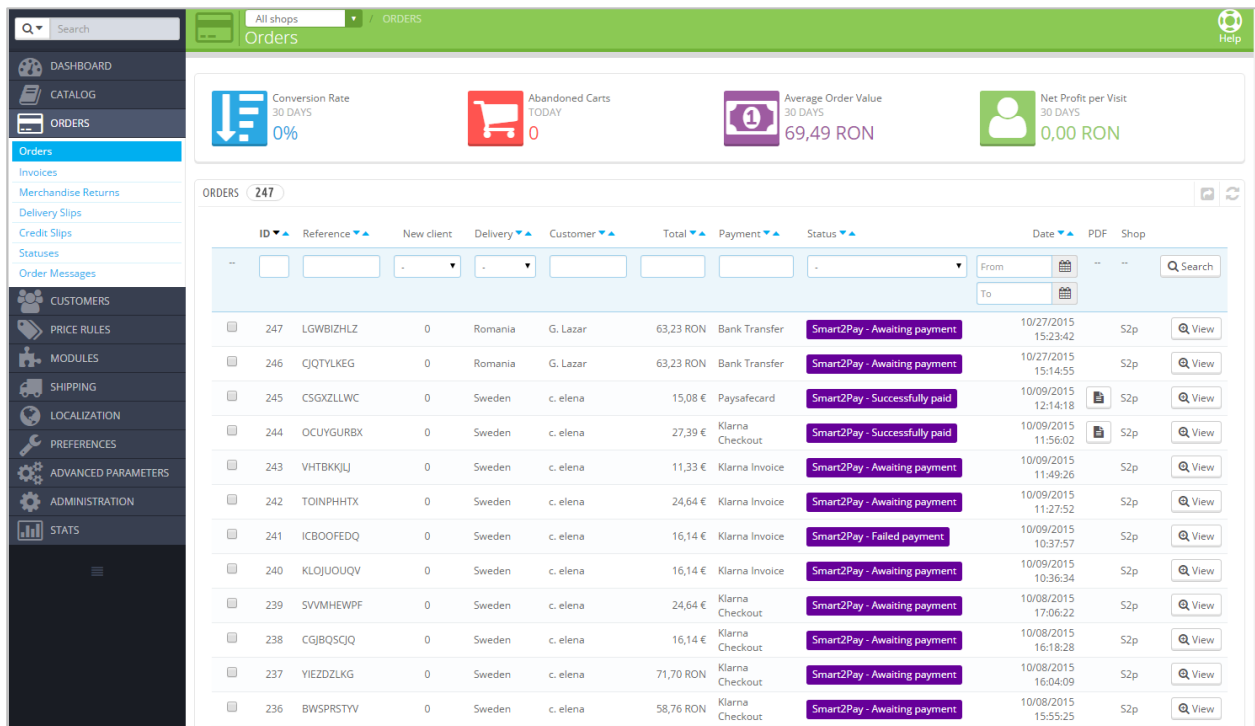

Upon completion of the payment flow, the customer is redirected back to your website.

The image shows the return page after a successful payment. It has a light gray background with a white border. At the top, there is a navigation bar with a home icon and the text 'Transaction Completed'. Below this, the text 'THANK YOU FOR SHOPPING WITH US!' is displayed in a bold, sans-serif font. A horizontal line separates this from the main message, 'The payment succeeded', which is centered and displayed in a large, bold, sans-serif font.

Image 16 – Return page when the redirection status is a success

## Payment status notification

After receiving the final confirmation from the provider, our server notifies Prestashop about the status change. The plugin handles these notifications and updates the order accordingly. This can be checked in Prestashop backend in *Orders area*.

The screenshot shows the Prestashop Orders page. The top navigation bar includes a search bar, a dropdown for 'All shops', and the 'ORDERS' tab. Below the navigation bar, there are four summary cards: 'Conversion Rate 30 DAYS' at 0%, 'Abandoned Carts TODAY' at 0, 'Average Order Value 30 DAYS' at 69,49 RON, and 'Net Profit per Visit 30 DAYS' at 0,00 RON. The main content area displays a list of orders with columns for ID, Reference, New client, Delivery, Customer, Total, Payment, Status, Date, PDF, and Shop. The status column shows various payment statuses, including 'Smart2Pay - Awaiting payment', 'Smart2Pay - Successfully paid', and 'Smart2Pay - Failed payment'.
